Robot Customization

Customization Robots with different Configurations

Robotic Extension, Sensor & AI Systems

Depends on Application −
- We can customize and install Robotic Arm for actions
- We can install various cameras, thermal imaging camera, lidar, or different sensors

Computer Systems & AI Systems

Option 1: Computer with/without GPU options
Option 2: Custom-made 32bit MCU board / Controller board

Motor & Control Systems

Option 1: We select different motors for different purposes. different loading capacities, precision (servo, DC brushless), w/encoders)
Option 2: We use other ready-made Partner component-set
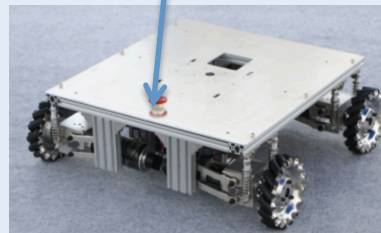

With 避震   Without 避震

Car Chassis / Wheels

We customized car chassis
Option 1: We use other Partner's Chassis
Option 2: We make our own chassis
(Different Drivetrain, wheel types ⋯etc)

Thermal Imaging Integration

Our US Partner System

Our China's Partner System

We are creating our own at the moment.

<u>We currently have 3 types of solution in Thermal Imaging Integration</u>
- **<u>2 of them are partners camera solution</u>**
- **<u>1 of them are our own customization</u>**
